

- This is a secondary research competition; your source of data will be required to prove credibility.
- Research interesting coffee consumption patterns and other quirky data sets in the world. Example highest age countries and highest coffee drinking countries per capita (Is there a correlation, the highest coffee drinking countries with the highest number of metal bands in the county)
- Create an interesting data visualization for your correlated data, this could be an infographic or anything you would like to choose.
- Draw 5 inferences and insights from your Data Analysis and include.
- Participants need to submit a PPT of a maximum of 5 slides on or before Apr 21, 2024 11:59 PM IST (excluding the cover and thank you slide), **data sources need to be secondary, authentic, and valid links to be included.**
